What's innovative about the product?

Monin Syrups are designed for genuine taste, modeled after the flavours they're named for. Love for their more natural ingredients, Monin Syrups can be used in coffees, lattes, cappuccino and other espresso-based drinks. Far from being limited to coffee, Monin has a line of fruit-flavoured syrups that are perfect in tea, cocktails, mocktails and italian sodas. Whether you're a lover of sweet flavours like the Amaretto or nut-flavoured like the Hazelnut, Monin has something for you.
