What's innovative about the product?

We are a pickle specialist from Edmonton Alberta. We offer a fresh twist on a really traditional product. We package in stand up poly bags and our flavours are globally inspired and re imagined. We've been on the Top100 things to eat in Edmonton for 4 years running with our Mexican Pickled Carrots and KimChi Style Brussels Sprouts. We're known at Farmers' Market for having rarities and oddities like pickled Grapes, Peaches and Strawberries. We are in the local section of SavOnFoods in Alberta and they've been supportive partners for us. We're also very popular with the guys for our Pickled Eggs. I always joke that you can eat ours sober!

Will there be samples available at the show?
Yes
