

Natural Gas costs are Falling

Track the market down and gain the benefits with Direct Energy Business

Through the CFIG's partnership with Direct Energy Business, members can gain direct access to the wholesale market, giving you more control over your Natural Gas and Electricity costs.

As the Natural Gas market is forecasted to fall over the coming years, products like our AECO 5A Index let you track the wholesale market and gain the financial benefits of following it down. Compared to your local gas utility, our Natural Gas Index products have historically been more competitive, whilst also providing greater flexibility in how you manage these costs. For CFIG members, Direct Energy Business will offer discounts on their administration fees across their full range of solutions.

Direct Energy Business can supply Natural Gas, Electricity and Efficiency solutions across all open markets in Canada. Contact Mark for a no obligation discussion and review of your business's energy needs:
